WithSecure™ Elements Cloud, our AI-powered cyber security portfolio, is a proactive and cost-effective solution thanks to its modular setup, and tailored specifically for the mid-market security needs.

Exposure Management

Extended Detection and Response

WithSecure™ Elements Cloud

Cyber security, the European way

Co-Security Services

In today's cyber landscape, threats have become industrialized, posing equal risks to enterprises of all sizes. While large corporations can afford high-priced specialists and technology for their defences, the mid-market often lacks access to such resources.

That's where we come in. We aim to democratize cyber security capabilities, bringing advanced solutions and elite practitioners to the mid-market. And integrated with European regulations from day one.

Blend our technologies and services for the security outcomes your business needs

WithSecure™ Elements Exposure Management

Is a continuous and proactive solution that predicts and prevents breaches against your company's assets and business operations. The solution provides visibility into your attack surface and enables AI-powered remediation.

WithSecure™ Elements Extended Detection and Response

WithSecure Elements Extended Detection and Response (XDR) is designed for modern IT estates to enable organizations to understand and respond to advanced threats across endpoints, identities, cloud, emails, and collaboration tools (SharePoint, OneDrive, and Microsoft Teams).

Co-Security Services

Extend your security team to WithSecure or to our partners with flexible Co-Security Services that range from the on-demand WithSecure Elevate to managed services, like WithSecure™ Managed Detection and Response.

AI-Powered WithSecure™ Elements Cloud

WithSecure Luminen is an artificial intelligence (AI) experience that uses a Large Language Model (LLM) in providing Elements users with contextual and actionable guidance for their cyber security management tasks.
